eMAM proudly teamed up with Drastic.TV to extend support to Drastic.TV's Net-X-Code to create two new products: Net-X-Proxy and Net-X-Code.

Net-X-Proxy was developed for cost sensitive clients who needed a robust solution to create proxy/thumbnail files of almost any video file format being ingested into their eMAM system. $495.00

Net-X-Convert is a scalable file conversion system for automated creation of proxy, thumbnail, broadcast and post production file formats. Designed to work anywhere from a command line plugin to a multi server distributed conversion system for enterprise, Net-X-Convert can grow to support any size organization. Based on a merger of Drastic's MediaReactor and Net-X-Code products, Net-X-Convert supplies the file transform glue used by ESPN, the NBA and other major content producers. $1995.00

eMAM in conjunction with Net-X-Proxy allows you to create proxy subclips of files, and if you need high resolution subclips or subclips in a different format, eMAM and Net-X-Convert have you covered.

Both can be purchased directly from the drastic web site at:
